Shaped by real Users

At critical development milestone, real consumers — both internal and external — are invited to test, respond, and guide the product forward.

This continuous loop between users and R&D is what ensures our products meet genuine needs — not just technical specifications.

Industrial Design

Award-Winning Aesthetics

- Elite Team Trusted by Global Luxury Brands
- Recognized by 38 Top Design Awards
- Acclaimed by the Famous Design Publication

In-House Z-Lab

Reliable Quality Control

Millions-Invested Quality Lab | Accredited by CNAS, SGS, and TÜV

Our Z-Lab is built to international testing standards and equipped with high-precision instruments that meet medical device verification standards.

Reliable Quality Control

More

Quality isn't a final checkpoint. It's built into every stage — from stress simulation to 100% core feature inspection before every shipment.

- **Extreme Stress Tests**

Simulating extreme global environments and real-world high-frequency usage to ensure total reliability.

- **100% Core Feature Inspection**

Total inspection of critical parts and features for a strict delivery standard.

- **Customizable QC Solutions**

Customizable quality control process tailored to the different market needs.

Beauty Care

FC100 Pro Series

Beauty Care

Lift & Firm Beauty Device

Optional 16 Range RF · Red LED · Microcurrent · EMS · Vibration

- 01 One device. Every skin concern covered.**
From firming to lifting to toning — everything your skin needs.
- 02 Full-face coverage. Half the time.**
Wide-surface design. Every pass counts.
- 03 At-home clinical care. 100% peace of mind.**
5-layer sensor system. Every session safe.

FR100 Pro

Beauty Care

Lift & Firm Beauty Device

16 Range RF · Red LED · Microcurrent · EMS

01 **Effective anti-aging starts at the source.**

Not just surface. 16 range RF penetrates deeper to boost collagen production by up to 45.82%*.

02 **Triple-energy in One Surge. Full face in 6 minutes.**

RF, microcurrent, and red light work in perfect sync, targeting every layer of aging for full-face results in 6 minutes.

03 **Always safe, always controlled.**

A 5-layer smart temperature system monitors every session in real time.

*Data based on an independent third-party laboratory report. Individual results may vary.

FR200

Beauty Care

Lift & Firm Beauty Device

16 Range RF · Red LED · Yellow LED · Microcurrent · EMS

- 01 Dual-Light Energy. Brighter skin. Stronger barrier.**
High-intensity 630nm red light firms and brightens — paired with 590nm yellow light to rebuild your skin barrier.
- 02 Always safe, always controlled.**
A 5-layer smart temperature system monitors every session in real time.
- 03 Plug in or go cordless. Always ready when you are.**
Cordless & corded operation with fast charging.

EH320

EH340

EE130

Beauty Care

Microcurrent Portable Beauty Device

Compact & easy enough. 5-minute beauty on your schedule — wherever the day takes you.

01 EMS Stimulation

Firms and tones deeper skin effectively — a mini workout for your skin, every day.

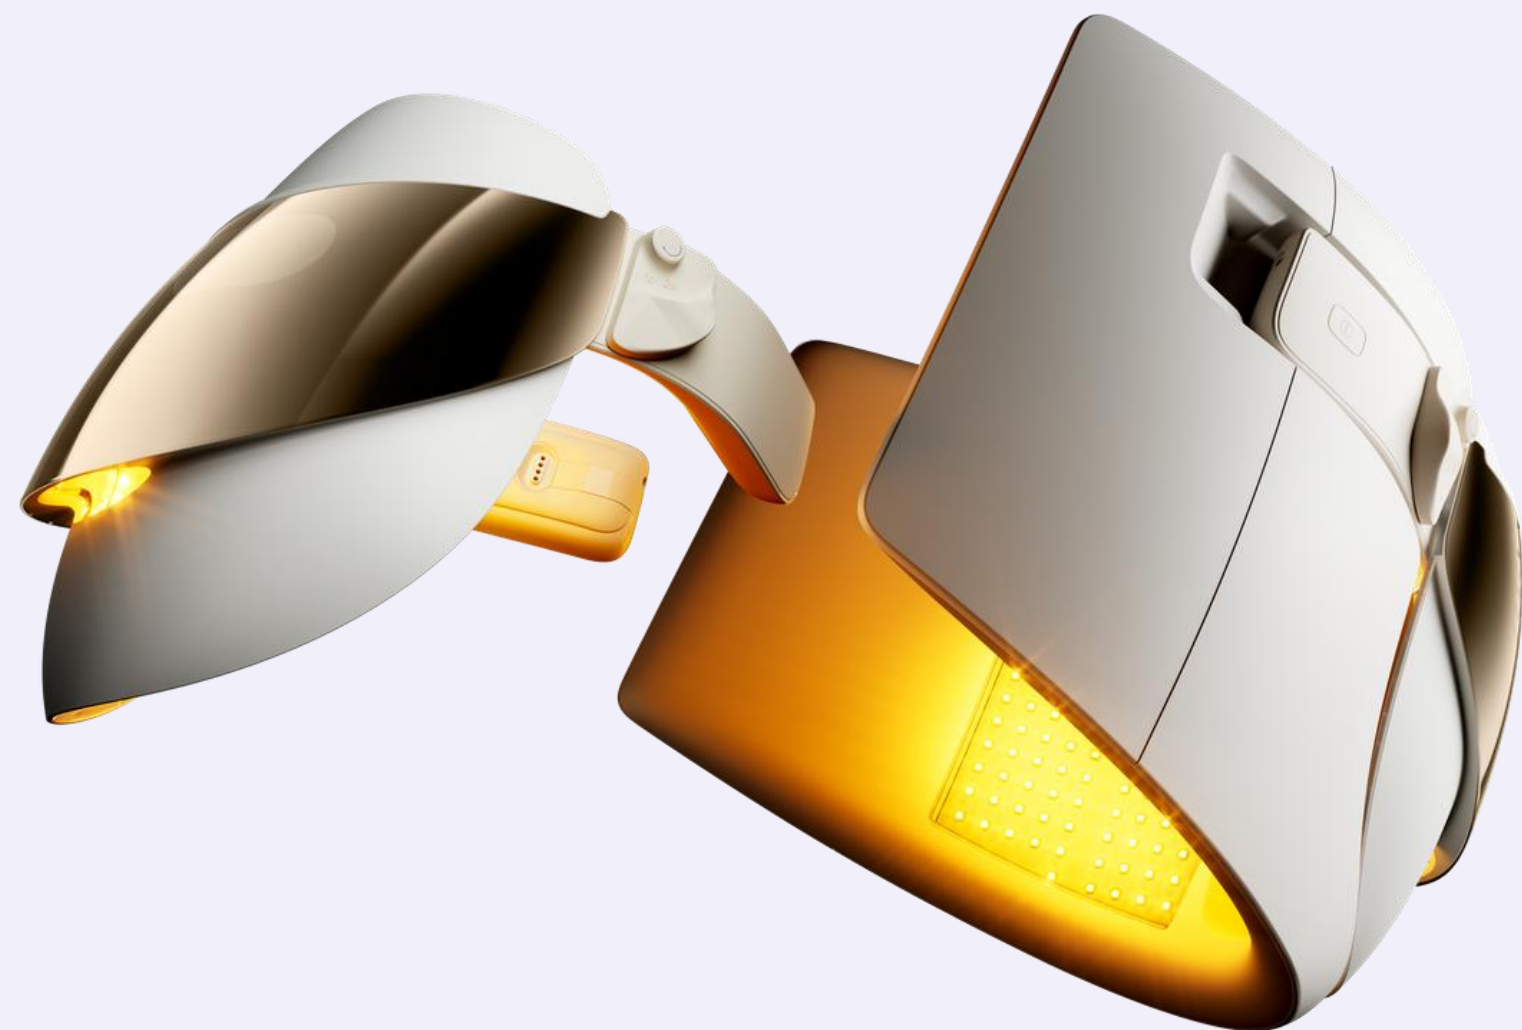

02 Thermal Therapy

Gentle warmth opens the skin's surface — so every drop of serum goes deeper.

03 630nm Red Light*

Fades fine lines, reduces puffiness, and brightens skin tone with clinical-wavelength light therapy.

*LED for EE130.

WL200

Beauty Care

Full-Coverage LED Therapy

Experience salon-grade luxury at home.

SCI-Published

Clinic-Level

590nm yellow light · 630nm red light · 830nm near infrared
